FIGS. 8A, 8B and 8C disclose another embodiment of the invention 70 wherein this embodiment includes a base section 71 which is shaped as a bowl having a rounded top. Inside base section 71 are side walls 73 with a plurality of holes 72 for receiving LED lights. These side walls dip down to form a deep bowl shaped product. In addition, there is a reflective protrusion 74 shaped as a dome which is coupled to a bottom end 75. Reflective dome shaped protrusion has a series of holes 76 which allow LED lights to fit through. Thus, these LED lights can fit through both holes 72 in side walls 73, and holes 76 in dome 74. Reflective dome 74 also includes a pre-dome section 78 which provides a transition area between ~~base section 75~~ bottom section 75 and dome section 74.
